

The **ABAC sanitizing kit** is safe, easy to use, efficient and easy to operate. It's an indispensable aid to sanitize any location. From vehicles, office buildings and other private and public facilities.

# SANITIZING KIT

## The optimal solution for deep cleaning intended for virus and bacterial elimination

By easily using pressurised air through the ABAC sanitizing fluid applicator, the disinfecting process is fast and efficient, reaching areas normally out of sight and inaccessible with traditional application methods.

Thanks to the ABAC sanitizing kits vaporisation capability, all surfaces benefit from a uniform and even application of the disinfectant, ensuring outstanding results in the deep clean process not normally achieved with manual hand application.

The ABAC sanitizing kit can be used safely in a wide variety of environments including:

- Private offices (halls, meeting rooms, etc)
- Small and medium business facilities such as shops, bars, restaurants and other social gathering areas
- Manufacturing plants (including production areas and lab facilities)
- Medical centres such as dentists, doctors and pharmacies
- Public transport (trains, buses and aircraft)
- Educational establishments such as schools and kindergarten

**Air Compressor** – Safe, portable and easy to operate

**Application Hose** – Flexible, durable and compact

**Sanitizer fluid applicator** - Light and easy to use with a consistent and even fluid vaporisation.

### Technical data

2236115861 SUITCASE 6 Air compressor	
Tank capacity	6 liters
Engine power	1,5 HP
Pressure	8 bar
